Case Study

Top-class measurement technology

Hexagon Manufacturing Intelligence offers a comprehensive range of products and services for all applications of industrial measurement technology and this gives its customers complete control over their manufacturing processes. GO! ensures maximum efficiency of production systems through its rapid and flexible service.

Hexagon systems are used in the evaluation of manufacturing procedures, process qualification and final inspections. This enables customers from industries such as automotive construction, aviation and energy to resolve or minimise deficiencies through the assessment of each individual manufacturing step and thus increase their production levels and efficiency. The large range of services includes solutions for every industry and every type of application. The product range covers macro (e.g. mountains or bridges), micro and nano-measurements. In relation to service, Hexagon has placed its trust in the courier and express services of GO! for the reliable delivery of highly sensitive replacement parts for over 10 years.

Global service for complete measurement data acquisition

Hexagon Manufacturing Intelligence based in Wetzlar, in Hesse, is one of the world’s leading providers of customised measurement systems, specially tailored to the needs and desires of its customers. These highly specialised solutions for demanding industrial measurement tasks save customers time and money. With comprehensive service programmes, Hexagon customers can continue to benefit from the expertise of application engineers for years after making their purchase. With over 20 production sites, 70 precision centres for services and a network of over 100 sales partners across five continents, the measurement service specialist gives its customers complete control over their manufacturing processes.
When the exception becomes the norm

Maintenance or repair work to measurement equipment which is typically installed centrally in production lines needs to be scheduled in such a way as to avoid long stoppages to production. In addition to maximum adherence to schedules, this also requires a high degree of flexibility on the part of the service provider who supplies replacement parts or necessary equipment to customers in such cases. “For this type of sensitive transportation, GO! Express & Logistics is really the option for us. GO! fulfils our company principles in every respect. GO! offers 100% quality, 100% punctuality and 0% damages,” says Ulrich Gras, head of logistics at Hexagon. GO! has met these demands every day of the year for over 10 years, around 300 times per year, and works according to collection and delivery times within timeframes that are adapted to production times. Very early in the morning and very late in the evening. GO! courier drivers act as partners and, with their high level of commitment, ensure that the deliveries reach their destinations on time.
About Hexagon Manufacturing Intelligence

Hexagon Manufacturing Intelligence offers a comprehensive range of products and services for all applications of industrial measurement technology in industries such as automotive construction, aerospace, energy and medical technology. The company provides its customers with key measurement data throughout the entire life cycle of their products – from development and design through to production, assembly and final inspection. Hexagon is part of the Hexagon AB Group (Nordic Exchange: HEXA B; www.hexagon.com). The company is one of the world’s leading providers of design, measurement and visualisation technologies for the construction, measurement and positioning of objects, as well as the processing and presentation of data. Hexagon has 12,000 employees in over 40 countries.

About GO! EXPRESS & LOGISTICS

GO! Express & Logistics is Germany’s largest unaffiliated provider of express and courier services. The worldwide partner network was established in 1984 and currently includes over 100 GO! stations in Germany and Europe. Highly qualified employees and couriers transport more than five million shipments per year.

True to the corporate philosophy IT’S ALL ABOUT TIME, GO! offers regional courier transport and worldwide express delivery of goods, documents and particularly time-critical shipments round the clock 365 days a year. Customised supply chain solutions, tailor-made industry solutions and special services in response to complex customer requirements complete the portfolio.
