The prices for these additional services are listed in Annex 1.

■ Notes

Size and weight information

The higher value between the real weight and the volume weight according to the IATA formula with the divisor 5,000 is used to calculate the rate per kilogram.
 $VW \text{ (in kg)} = L \times W \times H \text{ (each in cm)} / 5,000$
 For consignments comprising multiple parcels, the kilogram rate of the chargeable weights of all parcels will be added together.

Individual parcels may not exceed a weight of 50 kg or a length of 2.70 m when the combined length and girth measure 5.00 m, calculated as $(L + 2 \times W + 2 \times H)$. If this is the case, please contact your GO! Station.

Bulky-goods surcharge

A bulky-goods surcharge applies if a parcel exceeds the following dimensions: 50 kg in weight, 1.30 m in length and / or length and girth combined measuring 3.60 m.

Island services

Please consult your GO! station for service conditions for islands in the North Sea and Baltic Sea.

Fuel surcharge / security charges

See general-overnight.com for the currently applicable fuel surcharges. In the case of air freight consignments (e.g. same-day service), a fuel surcharge may apply.

When placing an order, the current services, rates and terms and conditions of GO! Express & Logistics Deutschland GmbH apply. The currently applicable general terms and conditions can be viewed on our website general-overnight.com. Information is subject to change.
